## **SAFETY INSTRUCTIONS**

This manual explains the proper installation and use of your Rangehood, please read it carefully before using even if you are familiar with the product. The manual should be kept in a safe place for future reference.

These instructions shall also be available in an alternative format, e.g. on a website or on request from the user in a spec sheet format.

### Things to never do:

- Do not try to use the Rangehood without the grease filters or if the filters are excessively greasy!
- Do not install above a cooker with a high level grill.
- Do not leave frying pans unattended during use because overheated fats or oils might catch fire.
- Never leave naked flames under the Rangehood.

- If the Rangehood is damaged, do not attempt to use.
- Do not flambé under the Rangehood.
- CAUTION: Accessible parts may become hot when used with cooking appliances.
- The minimum distance between the supporting surface for the cooking vessels on the hob and the lowest part of the Rangehood. (When the Rangehood is located above a gas appliance, this distance shall be at least 65 cm)
- The air must not be discharged into a flue that is used for exhausting fumes from appliances burning gas or other fuels.

### Things to always do:

- Important! Always switch off the electricity supply at the mains during installation and maintenance such as light bulb replacement.
- The Rangehood must be installed in accordance with the installation instructions and all measurements followed.

- All installation work must be carried out by a competent person or qualified electrician.
- Please dispose of the packing material carefully. Children are vulnerable to it.
- Pay attention to the sharp edges inside the Rangehood especially during installation and cleaning.
- When the Rangehood is located above a gas appliance, the minimum distance between the supporting surface for the cooking vessels on the hob and the lowest part of the Rangehood that distance must be:  
Gas cookers: 75 cm  
Electric cookers: 65 cm  
Coal or oil cookers: 75 cm
- Make sure the ducting has no bends sharper than 90 degrees as this will reduce the efficiency of the Rangehood.
- Warning: Failure to install the screws or fixing device in accordance with these instructions may result in electrical hazards
- Warning: Before obtaining access to terminals, all supply circuits must be disconnected.

### Things to always do:

- Always put lids on pots and pans when cooking on a gas cooker.
- When in extraction mode, air in the room is being removed by the Rangehood. Please make sure that proper ventilation measures are being observed. The Rangehood removes odours from room but not steam.

- Rangehood is for domestic use only.

- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
  - This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

- Children should be supervised to ensure that they do not play with the appliance.

- Warning: Before obtaining access to terminals, all supply circuits must be disconnected.

#### Things to always do:

- Caution: The appliance and its accessible parts can become hot during operation. Be careful to avoid touching the heating elements.

Children younger than 8 years old should stay away unless they are under permanent supervision.

- There shall be adequate ventilation of the room when the Rangehood is used at the same time as appliances burning gas or other fuels.
- There is a fire risk if cleaning is not carried out in accordance with the instructions
- Regulations concerning the discharge of air have to be fulfilled.
- Clean your appliance periodically by following the method given in the chapter MAINTENANCE.
- For safety reason, please use only the same size of fixing or mounting screw which are recommended in this instruction manual.
- Regarding the details about the method and frequency of cleaning, please refer to maintenance and cleaning section in the instruction manual.
- Cleaning and user maintenance shall not be made by children without supervision.
- When the Rangehood and appliances supplied with energy other than electricity are simultaneously in operation, the negative pressure in the room must not exceed 4 Pa ( $4 \times 10^{-5}$  bar).
- WARNING: Danger of fire: do not store items on the cooking surfaces.
- A steam cleaner is not to be used.
- NEVER try to extinguish a fire with water, but switch off the appliance and then cover flame e.g. with a lid or a fire blanket.

## **INSTALLATION (VENT OUTSIDE)**

### **Schematic diagram**

1. Connect the Rangehood main body with the external cabinet by control wire, to achieve power on and off, and also speed switching.
2. The control wire is separated into 3 parts, the first two parts are fixed onto the main body and external cabinet, while the middle part is extension wire.
3. The Rangehood main body and the external cabinet will exhaust the smoke to outdoor after installing the expansion pipe.

### **MOUNTING OF THE V-FLAP**

If the Rangehood does not have an assembled V-flap 1, you should mount the half-parts to its body. The images only show an example of how to mount the V-flap, the outlet may be various according to different models and configuration.

To mount the V-flap 1 you should:

- Mount two half-parts 2 into the body 6
- a pin 3 should be top oriented;
- the axis 4 should be inserted in the holes 5 on body;
- repeat all the operations for the 2nd half-part

## INSTALLATION

If you have an outlet to the outside, your Rangehood can be connected as below picture by means of an extraction duct (enamel, aluminium, flexible pipe or non-flammable material with an interior diameter of 220mm)

1. Before installation, turn the unit off and unplug it from the outlet.

2. The Rangehood should be placed at a distance of 65~75cm above the cooking surface for best effect.

Pic1

3. Drill a hole in the cupboard, please refer to pic below for the hole wide. Make sure the hole edge to the cupboard edge at least 35mm distance.

85CM

Pic 2

4. Install the outlet seal ring and outlet, and fix them with 8 pcs 4\*14mm screws, see pic 3.

Pic 3

4. Put the hood into the cabinet, tighten up the screws by screwdriver, and make sure the hood was fixed. See Pic 4.

Pic 4

tighten up the screws anticlockwise direction

5. Install the wall mounted bracket, and fix with 4 pcs M4 screws, spring washers and gaskets. See Pic 5.

Pic 5

Pic 6

6. Equip the expansion pipe, and use stainless steel hoop to fix it. See pic 6.
7. Make a  $\varnothing 220\text{mm}$  hole on the wall, and let the expansion pipe and motor connecting wire to across the wall together. Screw 4 pcs wall plugs into the wall, and then fix the cabinet on the wall with 4 pcs 4\*30mm screws. See pic 7.

Pic 7

Pic 8

8. Install the expansion pipe onto the main body outlet and fix it with cable tie. Connect the motor extension wire both end with the external cabinet control wire and main body top control wire. The plastic base of the control wire should be plugged to the bottom, and make the bucket to tight status. See pic 8.

Note: You need to loosen the connecting wire before repair, follow the steps as below:

- a. Rotate the lock catch of the connecting wire following the arrow direction.
- b. Pull out the connector.

9. Installation is finished. See Pic 9.

Pic 9

### HINTS FOR EXHAUST DUCT INSTALLATION

The following rules must be strictly followed to obtain optimal air extraction:

- Keep expansion pipe short and straight.
- Do not reduce the size or restrict expansion pipe.
- When using expansion pipe always install the pipe pulled taut to minimize pressure loss.
- Failure to observe these basic instructions will reduce the performance and increase noise levels of the Rangehood.
- Any installation work must be carried out by a qualified electrician or competent person.
- Do not connect the ducting system of the hood to any existing ventilation system which is being used for any other appliance, such as warmer tube, gas tube, hot wind tube.
- The angle of the bend of the expansion pipe should not be less than 120°; you must direct the pipe horizontally, or, alternatively, the pipe should go up from the initial point and should be led to an outer wall.
- After the installation, make sure that the Rangehood is level to avoid grease collection at on end.
- Ensure the expansion pipe selected for installation complies with relevant standards and is fire retardant.

WARNING:

- For safety reason, please use only the same size of fixing or mounting screw which are recommended in this instruction manual.
- Failure to install the screws or fixing device in accordance with these instructions may result in electrical hazards.

## **Start Using Your Rangehood**

### **Electronic button**

1. Press the button “Low”, the inner indicator light of switch starts shining, the motor is running at low speed. Press the button again, the motor stop.
2. Press the button “Mid”, the inner indicator light of switch starts shining, the motor is running at medium speed. Press the button again, the motor stop.
3. Press the button “High”, the inner indicator light of switch starts shining, the motor is running at high speed. Press the button again, the motor stop.
4. Press the button “Light”, both lights start shining. Press the button again, the lights are switched off then.

## **TROUBLESHOOTING**

<b>Fault</b>	<b>Possible Cause</b>	<b>Solution</b>
Light on, but motor does not work	Fan switch turned off	Select a fan switch position.
	Fan switch failed	Contact service centre.
	Motor failed	Contact service centre.
Light does not work, motor does not work	House fuses blown	Reset/Replace fuses.
	Power cord loose or disconnected	Refit cord to power outlet. Switch power outlet on.
Lights not working Insufficient suction	Broken/Faulty globes	Replace globes as per this instruction.
	The distance between the Rangehood and the gas top is too far	Refit the Rangehood to the correct distance.
The Rangehood inclines	The fixing screw not tight enough	Tighten the hanging screw and make it horizontal.

### **NOTE:**

Any electrical repairs to this appliance must conform to your local, state and federal laws. Please contact the service centre if in any doubt before undertaking any of the above. Always disconnect the unit from the power source when opening the unit.

## **MAINTENANCE AND CLEANING**

Caution:

- Before maintenance or cleaning is carried out, the Rangehood should be disconnected from the main power

supply. Ensure that the Rangehood is switched off at the wall socket and the plug removed.

- External surfaces are susceptible to scratches and abrasions, so please follow the cleaning instructions to ensure the best possible result is achieved without damage.

## GENERAL

Cleaning and maintenance should be carried out with the appliance cold especially when cleaning. Avoid leaving alkaline or acid substances (lemon juice, vinegar etc.) on the surfaces.

## STAINLESS STEEL

The stainless steel must be cleaned regularly (e.g. Weekly) to ensure long life expectancy. Dry with a clean soft cloth. A specialised stainless-steel cleaning fluid may be used.

### NOTE:

Ensure that wiping is done along with the grain of the stainless steel to prevent any unsightly crisscross scratching patterns from appearing.

## CONTROL PANEL SURFACE

The inlay control panel can be cleaned using warm soapy water. Ensure the cloth is clean and well wrung before cleaning. Use a dry soft cloth to remove any excess moisture left after cleaning.

### Important

Using neutral detergents and avoid using harsh cleaning chemicals, strong household detergents or products containing abrasives, as this will affect the appliance appearance and potentially remove any printing of artwork on the control panel and will void manufactures warrantee.

## GREASE MESH FILTERS

The mesh filters can be cleaned by hand. Soak them for about 3 minutes in water with a grease-loosening detergent then brush it gently with a soft brush. Please do not apply too much pressure, avoid to damage it. (Leave to dry naturally out of direct sun light)

Filters should be washed separately to crockery and kitchen utensils. it is advisable not to use rinse aid.

## INSTALLING GREASE MESH FILTERS

- To install filters for the following four steps.
  - Angle the filter into slots at the back of the hood.
  - Push the button on handle of the filter.
  - Release the handle once the filter fits into a resting position.

- Repeat to install all filters.

## BULB REPLACEMENT

<p>Important :</p> 	<ul style="list-style-type: none"><li>✧ The bulb must be replaced by the manufacturer, its service agent or similarly qualified persons.</li><li>✧ Always switch off the electricity supply before carrying out any operations on the appliance. When handling bulb, make sure it is completely cooled down before any direct contact to hands.</li><li>✧ When handling globes hold with a cloth or gloves to ensure perspiration does not come in contact with the globe as this can reduce the life of the globe.</li></ul>
--	---

## Change the LED light

Note:

- Before changing the lights, make sure that the appliance is unplugged.
  - Protect against danger when changing lights, such as wearing gloves.
  - Light replacement should be carried out by qualified service personnel only.
- 
- Switch the unit off and pull out the plug first.
  - Loose the 4 pcs 4X10MM screws at the back of case, and then take out the outer glass.
  - Loose the 2 pcs screws on the lamp bracket, and then change the LED light. See pic below.
  - Remove the grease filter.
  - Unscrew the 4pcs screws on the LED light strip bracket by cross screwdriver, dismantle the LED light strip and pull out the terminal of the light connecting wire. See pic 1. (Note: It will need to dismantle the front panel first for models cannot directly take down the light strip.)
  - Apply the reverse procedure to install the light strip back.

•LCOS D code for this lamp is: DSL-7-S-650

– Max wattage: 7 W

– Voltage range: DC 12V

Pic 1

**ENVIRONMENTAL PROTECTION:**

	<p>This product is marked with the symbol on the selective sorting of waste electronic equipment. This means that this product must not be disposed of with household waste but must be supported by a system of selective collection in accordance with Directive 2012/19/EU. It will then be recycled or dismantled to minimize impacts on the environment, electrical and electronic products are potentially dangerous for the environment and human health due to the presence of hazardous substances. For more information, please contact your local or regional authorities.</p>
--	---

**NOTE:**

The following shows how to reduce total environmental impact (e.g. energy use) of the cooking process).

- (1) Install the Rangehood in a proper place where there is efficient ventilation.
- (2) Clean the Rangehood regularly so as not to block the airway.
- (3) Remember to switch off the Rangehood light after cooking.
- (4) Remember to switch off the Rangehood after cooking.

**INFORMATION FOR DISMANTLING**

Do not dismantle the appliance in a way which is not shown in the user manual. The appliance could not be dismantled by user. At the end of life, the appliance should not be disposed of with household waste. Check with you Local Authority or retainer for recycling advice.
